

Parent Information

- The iBook/MacBook is meant for student use only. It is not meant to be a family computer or to be used by siblings in any way that would compromise access by the student.
- Parents are responsible for supervising student Internet use while at home; the filtering services we implement on the district network do not transfer to home use. Parental control software is installed on each student computer and can be activated upon request, though parents must understand that no monitoring solution is foolproof.
- Parents should monitor the use of the computer at home to ensure that its primary function is academic and that students are completing assigned school work rather than excessive gaming, chatting, etc.
- Use of Internet resources – including online curriculum content purchased by the district – will be an integral part of the learning activities in your child’s classes. If you have reservations or objections about your child having access to the Internet, please check the appropriate space in the parent section of the “Click-It” form. If you check this box, a school or district representative will contact you to discuss the matter.
